

# Coronet vs Cisco CloudLock

This document compares Coronet and Cisco CloudLock. Because cyber security packages sometimes differ in scope, we thought it would be most beneficial to compare using 7 key categories:

- Email Protection
- Cloud application protection
- Endpoint protection
- Access control
- Regulatory compliance
- Implementation and Maintenance
- Cost per user

Within each category, we listed the most important features that are required in order to provide adequate protection against the growing threat landscape.

## Features

			
Security Coverage (Summary)	Email Security	✓	✗
	Email Content Protection	✓	✗
	Cloud Application Security (e.g. Office 365, Dropbox, G Suite, etc.)	✓	✓
	Endpoint Security	✓	✗
	Data Security and Data Loss Prevention (DLP)	✓	✓
	Wi-Fi Security	✓	✗
Services Coverage	Office 365	✓	✓
	SharePoint	✓	✓
	OneDrive	✓	✓
	G-Suite	✓	GoogleDrive only
	Dropbox	✓	✓
	Box	✓	✓
	Slack	✓	✓
	Salesforce	✓	✓
Access Control	User Access	✓	✓
	User Behavior	✓	✓
	Malware and Ransomware	✓	✗
	Endpoint Posture	✓	✗
	Network Posture	✓	✗
	Geofencing	✓	✗
Data Loss Prevention	DLP Collaboration - Files	✓	✓
	DLP Collaboration - Emails	✓	✗
	DLP Discovery	✓	✗
	PII Scan	✓	5 Elements
	PCI Scan	✓	2 Elements
	PHI Scan	✓	✗
	Source Code Scan	✓	✗
	Certificates Scan	✓	✗
	Documents Scan	✓	✗
	Custom Type Scan	✓	✓
	Custom Content Scan	✓	✗
Protection Scope	Malware and Ransomware - Cross Organization Scan	✓	✗
	Malware and Ransomware - Industry leading engine	✓	✗
	Malware and Ransomware - Ransomware file spread monitoring	✓	✗
	Phishing Protection - Email body	✓	✗
	Phishing Protection - Attachments scan (e.g. Docs, PDFs, Text, Pictures)	✓	✗
	Phishing Protection - Spear phishing protection	✓	✗
	Endpoint Security - Anti-malware	✓	✗
	Endpoint Security -Device Vulnerabilities	✓	✗
	Endpoint Security - OS update for all operating systems	✓	✗
	Network Security (WiFi)	✓	✗
Pricing		\$5.99	\$9

## Implementation and Maintenance

		
Implementation	Less than 1 hour (All based)	20 hours (manually done)
Daily maintenance	None	On going
Training included	Yes, for any client	Yes
Ongoing tech-support	Yes, for any client	Yes

**In conclusion:** Cisco Cloudlock is a CASB. It protects your cloud users, data, and apps while meeting compliance regulations. As far as DLP goes, while storage is protected, PII, PCI and PHI are only partly implemented, and email exfiltration is left completely unattended

As one should expect from a CASB, not much is protected beyond cloud services and as such, emails and endpoints are unprotected by CloudLock. To be fully protected the organization will have to add other security layers by other security providers, making the operation more expensive and harder to manage.

Looking at costs, Cisco CloudLock CASB solution is priced at \$9/user/month compared to Coronet's comprehensive security platform at \$6.99/month. company, CloudLock's pricing is only a starting point, not including additional payments for supplementing solutions.

CloudLock can be labor intensive to manage and configure, while Coronet requires virtually no configuration, and no operational effort. Coronet was designed from the ground up to be inexpensive, elegantly simple, and requires virtually no human supervision.

Coronet provides enterprise grade cybersecurity for companies of any size.
