

# Security Awareness Training

Built for small IT teams with big responsibilities

Coro's Security Awareness Training (SAT) module empowers leadership, employees and contractors with the knowledge and tools to recognize phishing and social engineering attacks. SAT reduces human error and strengthens your cybersecurity posture through real-world phishing simulations and high-quality security awareness training. Using SAT shows that your business has proactively implemented security awareness measures, mitigating legal, financial, insurance, and reputational risks while safeguarding your organization and leadership.

## Modular Cybersecurity

Coro's SAT module is part of a powerful modular cybersecurity platform.

Designed to evolve with your needs, a modular platform ensures effortless security across devices, data, and endpoints while sharing one endpoint agent, one dashboard, and one data engine. Adding modules is done at the click of a button. Chosen modules snap into place, immediately integrating with other modules.

## Key Functionalities

-  **Phishing Simulations**  
Provides a library of phishing simulations to assess your organization's vulnerability to attacks and raise employee awareness of the latest threats. Offers pre-built templates that mimic real-world attacks and tracks the results.
-  **Adaptive Training**  
Automatically adjusts highly targeted training programs based on actual security exposures and user behavior. Creates a continuous learning loop based on real-time security insights by leveraging Coro's visibility into an organization's security posture.
-  **Reporting Suite**  
Delivers powerful analytics to pinpoint vulnerabilities after phishing simulations. Tracks simulations engagement, phishing failure and training completion rates. Offers dashboards and executive reports that provide compelling evidence of your organization's cybersecurity and compliance training progress
-  **Training Courses**  
Delivers focused, relatable training content that educates employees on best-practice cybersecurity through short video-based learning and quizzes. Includes ready-made courses for effortless training.
-  **Scheduled Training**  
Offers automated, scheduled training that seamlessly delivers the right content to the right people at the right time.
-  **User Feedback**  
Empowers users to report potentially malicious emails directly from their inbox with ease.

## Why Coro SAT?

**Compliance Assurance**  
Regulatory alignment and legal protection

**Leadership Risk Mitigation**  
Liability protection and reputation security

**Cyber Insurance Savings**  
Lower premiums and better coverage

**Fast Learning Curve**  
Minimal training, intuitive onboarding and interface

Thousands of Customers in **Automotive, Education, Energy, Financial** and more.

## About Coro

**Coro, the leading cybersecurity platform for small and mid-size businesses**, empowers organizations to easily defend against malware, ransomware, phishing, data leakage, network threats, insider threats and email threats across devices, users, networks and cloud applications. Coro’s platform automatically detects and remediates the many security threats that today’s distributed businesses face, without IT teams having to worry, investigate, or fix issues themselves. Coro has been named a leader in G2-Grid for EDR/MDR, received Triple-A grading (AAA) from SE LABS, and was named on Deloitte's Fast 500.
