

AI Lite

Cybersecurity Made Easy

Gain complete protection for your email and cloud apps with Coro AI Lite.

Powered by Coro's intelligent engine and Large Language Models (LLMs), the Email Security defends against data leaks and social engineering, automatically monitoring, flagging, and remediating advanced threats. The Cloud App Security ensures **secure access**, **advanced malware detection** and **robust remediation** to protect users, their cloud drives and apps.

Key Features

Coro AI Lite

-  **Cloud Applications**
Connects, monitors and controls a range of cloud apps: Microsoft Office 365, Google Workspace, Slack, Dropbox, Box, and Salesforce
-  **API-Based Cloud Email Protection**
Integrates directly with API-based email providers with no installation or hardware required
-  **Quarantine / Warn Modes**
Isolates suspicious emails or flags them with alerts for review
-  **Auto-Forward Protection Policy**
Deletes unauthorized auto-forward rules to external addresses
-  **Allow / Block Lists**
Defines trusted senders or blocks specific domains to control access
-  **Outbound Gateway**
Enables real-time monitoring and blocking of outbound emails that violate an organization's sensitive data policies
-  **Third Party Applications**
Lists and manages third-party apps connected to MS 365 and Google Workspace, offering control and visibility into app usage within the organization
-  **Advanced Threat Control**
Blocks any processes that exhibit suspicious behavior
-  **Real-Time URL Protection**
Rewrites and inspects email links at click time, blocking malicious sites and hidden redirect destinations
-  **End-User Phishing Report**
Provides users with regular reports of emails that Coro quarantined before reaching their inbox
-  **Inbound Gateway Setup Monitoring**
Verifies that inbound gateway is configured correctly and alerts when the configuration is incorrect
-  **App Connection & Permission Status**
Validates cloud app connections and permissions, with health status displayed
-  **Dedicated "Quarantine" Folder**
Stores detected malicious emails and files in the "Suspected folder" and creates a ticket for the event
-  **Threat Detection Policies**
Adds new threat detection policies and actions for admins, including alerts for abnormal admin activity, mass data actions, bot attacks, and identity compromise
-  **Impossible Traveller**
Detects login attempts from distant locations in unrealistically short intervals, helping identify potential credential compromise or unauthorized access
-  **User Feedback**
Provides tools for users to report phishing or misclassified emails
-  **Inbound Gateway**
Provides real-time detection and protection for incoming emails from all 3rd party providers at the delivery level
-  **Secure Messages**
Encrypts sensitive emails and offers a secure platform to access encrypted messages
-  **Phishing Sensitivity**
Reduces alert volume by configuring phishing sensitivity levels (high, medium, or low)

Why Coro?

High Threat Detection and Protection Rate
Achieved AAA rating from SE Labs

Easy to Maintain
95% of the workload offloaded from people to machines

Quick Deployment
Simple and quick installation, no hardware required

Fast Learning Curve
Minimal training, simplified onboarding, user-friendly interface

High ROI
No hardware costs, zero maintenance overhead, affordable pricing

High Customer Satisfaction
95% likelihood to recommend - as rated by G2

About Coro

Coro is the easy cybersecurity company. We designed a platform that every lean IT team will master. While other solutions scare people into buying complicated, confusing products, we lead with elegant simplicity. Coro is fast to deploy, easy to use, and designed not to waste your time. Once you install Coro, you'll hardly think about us. That's the point. Coro automatically detects and fixes security problems, so IT teams don't have to spend time investigating or troubleshooting. We're also one of the fastest-growing tech companies in North America, just ask Deloitte.
